mat120 all seat full
You must take an approval (by email/written application) for an extra seat from your course instructor/section teacher of our desired section **during the Fall 24 registration period. Not during pre advising.** If he/she approves then you have to submit that approval to SIC (Student information Center) 2nd floor. Then that course will be gradually added.

***For CSE/BBS extra seats, please contact your department during Fall 24 final advising period. Registrar office can not add any extra seats for CSE and BBS courses.***

If possible, I kindly request that you add MAT120 to my advising panel in any available section, provided it does not clash with my other classes or exam dates. I do not have a particular section preference, as most sections seem to be filled up at this time due to the popularity of the course. For the upcoming Fall 2024 semester, I would like to take five courses, including MAT120. If the limit is four courses, I am willing to drop one of the selected courses to accommodate MAT120. You can notify me via email regarding course drop.

For your better understanding, I have attached a video demonstrating the issue I am facing. I hope this helps clarify the situation.

Since the last date for advising is September 24th, I would greatly appreciate it if you could assist me as soon as possible by either resolving the error or adding MAT120 to my advising panel, provided it does not conflict with my other courses or exam dates.

Thank you for your support and assistance.

Sincerely,
Emon Sen Dibos

# Have completed prerequisite course, still showing precondition failed  Inbox

**EMON SEN DIBOS** Sep 22

to usis-help, Office ⌄

Dear Sir/Mam,

I hope this email finds you well. I am writing to seek assistance with an issue I am currently experiencing regarding course registration. Despite successfully completing the pre-requisite course-Mat110 for Mat120, I am still receiving a "Precondition Failed" error when attempting to register for the next course, Mat120 in the sequence,for the next fall 2024 semester.

In case the issue remains unresolved before the advising deadline,which is on September 24th , I have already selected four other courses, none of which encountered this issue.Given that our seats are limited, I reluctantly selected some unintended courses in place of MAT120 as a backup.but the problem didn't happen for that.it showed the same when i didn't select any subject .The same error occurred even when I had not chosen any other courses or with 0 course.
